Professional Summary

Computer Science Engineering graduate with Honors in Artificial Intelligence and Machine Learning, and hands-on experience building full-stack software solutions using Java, Python, SQL, and modern web technologies. Developed an AI-powered health analytics platform to process and analyze health data using machine learning models, and a disaster-resilient offline communication application enabling connectivity during network outages. Skilled in software development, problem-solving, data structures, algorithms, and end-to-end project execution. Seeking an entry-level Software Engineer position to contribute to scalable, innovative software solutions and grow as a full-stack developer.

Professional Skills

- **Programming Languages:** Java, Python
- **Core Concepts:** OOP, Collections, Exception Handling, Multithreading
- **Backend Technologies:** Spring Boot, JDBC, REST APIs
- **Frontend Technologies:** HTML5, CSS3, JavaScript
- **Databases:** MySQL, MongoDB
- **AI/ML:** Data Preprocessing, Pandas, Natural Language Processing (NLP), Scikit-learn, Prompt Engineering
- **Tools:** Git, GitHub, Postman

Projects

GuardX: Smart Health Analytics and Disease Prediction Platform | github.com/GuardX-Health-AI

- Developed a health analytics platform that predicts risk of Diabetes, Sepsis, Hypertension, Arrhythmia, and Pneumonia from vital signs and mental health assessments, using a Java Spring Boot REST API backend, MySQL database, Python-based machine learning models (Scikit-learn, Pandas), NLP for generating personalized health insights, and a web-based frontend for user interaction
- **Tech Stack:** Java, Spring Boot, JDBC, REST APIs, MySQL, Python, Scikit-learn, Pandas, NLP, HTML5, CSS3, JavaScript, Postman, Git

ResQLink: Disaster-Resilient Offline Communication Platform | github.com/ResQLink-Offline-Communication

- Developed an Android-based emergency communication application enabling peer-to-peer messaging without internet or cellular connectivity, using Bluetooth and Wi-Fi Direct for device discovery, a Java Spring Boot REST API for message sync and delivery tracking, and MongoDB for storing relay and routing data
- **Tech Stack:** Java, Spring Boot, REST APIs, MongoDB, Android, Bluetooth, Wi-Fi Direct, OOP, Multithreading, Git

Internship Experience

Retech Solutions Pvt. Ltd.

March 2024

AI Intern

- Developed an AI-powered customer support chatbot using NLP techniques to automate responses and reduce manual query handling, improving overall user experience.
- Designed and refined conversation flows through iterative testing, incorporating user feedback to improve response relevance, accuracy, and tone.
- Applied natural language processing and machine learning concepts to real-world chatbot development, gaining hands-on experience in intent recognition, response generation, and conversational design.

Education

Vel Tech Multi Tech Dr. Rangarajan Dr. Sakunthala Engineering College – Chennai

2022 – 2026

Bachelor of Engineering, Computer Science Engineering (Honours in AI & ML)

CGPA: 8.0

Arunmozhy Matriculation Higher Secondary School – Cuddalore

2021 – 2022

HSC (Class XII)

86%

Achievements and Certifications

- Secured 3rd Place in Codeathon 2024, organized by Vel Tech Multi Tech Engineering College.
- Solved 150+ problems on LeetCode, strengthening skills in Data Structures, Algorithms, and Problem Solving.
- Earned 5-Star Gold Badges in Java and SQL on HackerRank, reflecting strong proficiency in programming and database querying.
- Completed a certified course in Machine Learning for Industrial Applications, conducted by Retech Solutions.
- Earned HackerRank Software Engineer and SQL (Advanced) certifications, demonstrating proficiency in software engineering fundamentals, problem-solving, and advanced SQL concepts.
