Professional Summary

Computer Science Engineering graduate with Honors in Artificial Intelligence and Machine Learning. Proficient in Java, SQL, Python, and web technologies, with hands-on experience through internships and academic projects. Built an AI-powered health analytics platform and a disaster-resilient offline communication application, demonstrating strong software development and problem-solving skills. Seeking an entry-level Software Engineer role to apply technical skills and contribute to innovative software solutions.

Professional Skills

- **Programming Languages:** Java, Python
- **Core Java:** OOP, Exception Handling, Collections Framework, Multithreading, File Handling
- **Frameworks & Technologies:** Spring Boot, JDBC
- **Data Structures & Algorithms:** Arrays, Strings, Linked Lists, Stacks, Queues, Trees, Hashing
- **Web Technologies:** HTML5, CSS3, JavaScript
- **Databases:** MySQL, SQLite, MongoDB
- **AI/ML:** Machine Learning, Deep Learning, CNN, RNN, TensorFlow
- **Tools and Platforms:** IntelliJ IDEA, VS Code, Android Studio, Anaconda, Git
- **Soft Skills:** Problem Solving, Communication, Team Collaboration, Adaptability, Analytical Thinking

Projects

GuardX: Smart Health Analytics and Disease Prediction Platform

GitHub: github.com/GuardX-Health-AI

- Built GuardX, an AI-powered health analytics platform that analyzes vital signs and mental health assessments (PHQ-9, GAD-7) to predict the risk of Diabetes, Sepsis, Hypertension, Arrhythmia, and Pneumonia using TensorFlow/Keras, scikit-learn, and machine learning models.
- Developed a Python Flask REST API with SQLAlchemy and SQLite, integrated with a native Android (Java) application using Retrofit and Room, and implemented automated clinical report generation with personalized health insights and recommendations.
- **Tech Stack:** Python, scikit-learn, TensorFlow/Keras, Flask, SQLAlchemy, SQLite, Java, Android Studio, Retrofit, Room, HTML, CSS, JavaScript, Git

ResQLink: Disaster-Resilient Offline Communication Platform

GitHub: github.com/ResQLink-Offline-Communication

- Built ResQLink, an Android-based emergency communication application that enables peer-to-peer messaging without cellular or internet connectivity using Google Nearby Connections API, Bluetooth, and Wi-Fi Direct.
- Implemented reliable offline message delivery with Room (SQLite), store-and-forward message relaying, and MVVM architecture with Kotlin Coroutines to support asynchronous communication, multi-hop routing, and seamless user experience during disasters.
- **Tech Stack:** Kotlin, Android Studio, Google Nearby Connections API, Bluetooth, Wi-Fi Direct, Room, SQLite, MVVM, Kotlin Coroutines, Gson, Git

Internship Experience

Retech Solutions Pvt. Ltd.

March 2024

AI Intern

- Developed an AI-powered customer support chatbot to provide automated responses and improve the overall user experience.
- Designed, tested, and refined chatbot conversations to make responses more accurate, relevant, and user-friendly.
- Gained hands-on experience with machine learning and natural language processing concepts through real-world chatbot development.

Education

Vel Tech Multi Tech Dr. Rangarajan Dr. Sakunthala Engineering College – Chennai

2022 – 2026

Bachelor of Engineering, Computer Science Engineering (Honours in AI & ML)

CGPA: 8.0

Arunmozhy Matriculation Higher Secondary School – Cuddalore

2021 – 2022

HSC (Class XII)

86%

Achievements and Certifications

- Secured 3rd place in Codeathon 2024 conducted by Vel Tech Multi Tech Engineering College.
- Completed a value-added course in Machine Learning for Industrial Applications conducted by Retech Solutions Pvt. Ltd.
- Solved 150+ LeetCode problems, strengthening proficiency in data structures, algorithms, and problem-solving.
- Achieved 5-Star Gold Badges in Java and SQL on HackerRank, demonstrating proficiency in programming and database problem-solving.
